

Sales Invoice API — LoagmaPMS

Base URL (production): `https://loagmapms-hd5u.onrender.com/api`

All endpoints require `Authorization: Bearer <token>` — obtain the token from `POST /api/auth/login`.

Endpoints

1. Create Invoice (new order, billed immediately)

`POST /api/sales-orders`

Creates a new sales order with `status=billed`. If `admin_id` is provided, the PDF is generated automatically and the URL is returned.

Request

`POST https://loagmapms-hd5u.onrender.com/api/sales-orders`

Authorization: `Bearer <token>`

Content-Type: `application/json`

```

{
  "status": "billed",
  "customer_id": 1234,
  "doc_date": "2026-06-05",
  "admin_id": 1,
  "bill_number": "INV/26-27/001",
  "bill_dt": "2026-06-05",
  "doc_year": "26-27",
  "bill_roff": 0.50,
  "department": "Sales",
  "bill_narration": "June batch",
  "bill_vehicle": "GJ01AB1234",
  "bill_statement": "Payment due in 30 days.",
  "supplier_id": "SM001",
  "narration": "Order notes",
  "discount": 0,
  "delivery_charge": 0,
  "charges": [
    { "name": "Freight", "amount": 150.00, "remarks": "Road transport" }
  ],
  "items": [
    {
      "product_id": 42,
      "quantity": 10,
      "qty_delivered": 10,
      "price": 45.00,
      "hsn_code": "10063090",
      "unit": "Kg",
      "discount_percent": 0,
      "tax_percent": 5.0
    }
  ]
}

```

Field	Type	Required	Notes
status	string	Yes	Must be "billed" to generate invoice
customer_id	int	Yes	FK to user table
doc_date	date	Yes	YYYY-MM-DD
admin_id	int	No	Pass to auto-generate PDF

Field	Type	Required	Notes
bill_number	string	No	If omitted, server auto-assigns next number
bill_dt	date	Yes if billed	Invoice date YYYY-MM-DD
items	array	Yes	Min 1 item
charges	array	No	Extra charges (freight, etc.)

Response 201

```
{
  "success": true,
  "message": "Sales order created successfully",
  "pdf_url": "https://loagmapms-hd5u.onrender.com/storage/documents/sales-invoices/26-27/INV_26-27-001.pdf",
  "data": {
    "id": 268100,
    "so_number": "ORD-268100",
    "status": "BILLED",
    "bill_number": "INV/26-27/001",
    "bill_dt": "2026-06-05",
    "customer_id": 1234,
    "customer_name": "Ramesh Traders",
    "total_amount": 450.00,
    "bill_roff": 0.50,
    "grand_total": 623.00,
    "pdf_url": "https://loagmapms-hd5u.onrender.com/storage/documents/sales-invoices/26-27/INV_26-27-001.pdf",
    "charges": [{ "name": "Freight", "amount": 150.00, "remarks": "Road transport" }]
  }
}
```

pdf_url is null if admin_id was not sent or PDF generation failed. The order is still saved.

2. Update / Convert Existing Order to Invoice

PUT /api/sales-orders/{id}

Converts an existing pending/dispatched/delivered sales order into a billed invoice.

Request

PUT <https://loagmapms-hd5u.onrender.com/api/sales-orders/268082>

Authorization: Bearer <token>

Content-Type: application/json

```
{
  "status": "billed",
  "admin_id": 1,
  "bill_number": "INV/26-27/002",
  "bill_dt": "2026-06-05",
  "doc_year": "26-27",
  "customer_id": 1234,
  "doc_date": "2026-06-01",
  "bill_roff": 0,
  "charges": [],
  "items": [
    {
      "product_id": 42,
      "quantity": 10,
      "qty_delivered": 10,
      "price": 45.00,
      "tax_percent": 5.0
    }
  ]
}
```

Response 200

```
{
  "success": true,
  "message": "Sales order updated successfully",
  "pdf_url": "https://loagmapms-hd5u.onrender.com/storage/documents/sales-invoices/26-27/INV_26-",
  "data": {
    "id": 268082,
    "status": "BILLED",
    "bill_number": "INV/26-27/002",
    "pdf_url": "https://loagmapms-hd5u.onrender.com/storage/documents/sales-invoices/26-27/INV_;"
  }
}
```

Error responses

Code	Reason
404	Order not found
422	Order is in a closed state (cancelled/rejected/returned)
422	status=billed but bill_dt is missing

3. Generate / Re-generate PDF (on demand)

GET /api/sales-orders/{id}/pdf?admin_id={admin_id}

Regenerates the PDF for any existing billed invoice and saves it to disk. Use this to share the PDF link with a third party at any time — no re-invoicing needed.

Request

GET https://loagmapms-hd5u.onrender.com/api/sales-orders/268082/pdf?admin_id=1

Authorization: Bearer <token>

Query param	Type	Required	Notes
admin_id	int	Yes	Used to fetch company name, GST, bank details for the PDF header

Response 200

```
{
  "success": true,
  "pdf_url": "https://loagmapms-hd5u.onrender.com/storage/documents/sales-invoices/26-27/INV_26"
}
```

Error responses

Code	Reason
422	admin_id not provided
404	Order not found

Code	Reason
422	Order has no <code>bill_no</code> — not invoiced yet
500	Admin record not found, or PDF render error

The PDF file is overwritten each time this endpoint is called, so it always reflects the latest invoice data.

4. Get Order with PDF URL

GET `/api/sales-orders/{id}`

Returns full order detail. Includes `pdf_url` if a PDF has already been generated for this invoice.

Request

GET `https://loagmapms-hd5u.onrender.com/api/sales-orders/268082`

Authorization: Bearer <token>

Response 200

```

{
  "success": true,
  "data": {
    "id": 268082,
    "so_number": "ORD-268082",
    "status": "BILLED",
    "bill_number": "INV/26-27/002",
    "bill_dt": "2026-06-05",
    "customer_name": "Ramesh Traders",
    "total_amount": 450.00,
    "pdf_url": "https://loagmapms-hd5u.onrender.com/storage/documents/sales-invoices/26-27/INV_";
    "charges": [],
    "items": [
      {
        "id": 8842,
        "product_name": "Basmati Rice",
        "hsn_code": "10063090",
        "unit": "Kg",
        "quantity": 10,
        "price": 45.00,
        "line_total": 472.50
      }
    ]
  }
}

```

pdf_url is null if the PDF has not been generated yet for this invoice.

PDF File Storage

```

server/storage/app/public/
documents/
sales-invoices/
25-26/
  INV_25-26_001.pdf
  INV_25-26_002.pdf
26-27/
  INV_26-27_001.pdf

```

Files are served publicly at:

`https://loagmapms-hd5u.onrender.com/storage/documents/sales-invoices/{doc_year}/{filename}.pdf`

No authentication is required to download the PDF file directly via the URL — share the link freely.

Flutter Usage

```
import 'package:http/http.dart' as http;
import 'api_config.dart';
import 'controllers/auth_controller.dart';

// On-demand PDF
final response = await http.get(
  Uri.parse(ApiConfig.salesInvoicePdf(orderId)).replace(
    queryParameters: {'admin_id': '1'},
  ),
  headers: AuthController.getHeaders,
);
final body = jsonDecode(response.body);
final pdfUrl = body['pdf_url']; // open in browser or download
```
